## ***MULTI ANGLE CONCRETE SAW***

The cutting mechanism is by a vertical plunge movement which allows optimum use of space and prolongs the life of the diamond tipped saw blade.

The RoCo Multi Angle Saw is capable of cutting Hollow Core slabs up to 500mm in depth, 1200mm wide at any angle between 0 to 90 degrees, with the added capacity to cut long rips.

### ***Specifications:***

- |                                 |              |
|---------------------------------|--------------|
| • Length                        | 6.30m        |
| • Width                         | 2.10m        |
| • Height                        | 3.2m         |
| • Weight                        | 6200 Kg      |
| • Travel speed                  | 0 - 30 m/min |
| • Cutting time                  | 50 - 70 sec. |
| • Max Depth Cut                 | 500mm        |
| • Blade Size                    | 1300mm       |
| • Blade Motor                   | 45kW / 55kW  |
| • Hydraulic Motor               | 9 kW         |
| • Cable Reel                    | 0.5kW        |
| • Cable and water drum capacity | 180m         |

The Operator controls the Saw from a platform at the rear of the machine.

From the control platform the Operator has a clear unobstructed view of the cutting point on the slab.

Optional extras include an Angular Measurement Tool & Laser Marking Systems to ensure accurate cutting.
